

MOHAMED THABITH SHAHUL HAMEED

Graduate Software Engineer

Colombo, Sri Lanka | +94 76 655 3936 | shahulhameed.thabith@gmail.com | linkedin.com/in/thabithshahulhameed | github.com/Thabith2001

PROFESSIONAL SUMMARY

Graduate Software Engineer with full-stack experience building secure, production-grade applications using Java/Spring Boot and React/Next.js. Shipped REST APIs and end-to-end features across banking, POS, and e-commerce systems, with hands-on focus on authentication/authorization, relational data modeling, and API performance. Comfortable owning a feature end-to-end — from schema design to deployment.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, J2EE, REST APIs, Spring Security (JWT), Hibernate/JPA, Spring AI

Frontend: React, Next.js, HTML/CSS

Databases: MySQL, PostgreSQL, MongoDB

Tools & Practices: Git, Docker, MVC Architecture, Microservices Fundamentals

PROFESSIONAL EXPERIENCE

Full Stack Software Engineering Trainee

Aug 2025 – Apr 2026

Make It Viral Media & Technologies (Remote)

- Built and shipped production features on a Next.js web application integrating REST APIs, taking ownership from requirement analysis through deployment
- Diagnosed and resolved recurring production bugs and incidents, improving application stability and reducing repeat issue reports
- Improved backend API response times through query optimization and efficient data handling, streamlining integration with frontend services
- Collaborated with a cross-functional team in an Agile workflow, participating in sprint planning, code reviews, and daily stand-ups

PROJECT EXPERIENCE

Online Banking System — Java, J2EE, JWT, Hibernate, MySQL

- Designed and implemented secure REST endpoints with JWT authentication and role-based access control across multiple user roles, preventing unauthorized access to sensitive banking operations
- Built a layered MVC architecture with Hibernate ORM, reducing manual SQL and improving data-layer maintainability and readability
- Added request validation and structured JSON error handling to strengthen reliability and prevent malformed requests from reaching the data layer

Point of Sale (POS) System — Java, MySQL, Jasper Reports

- Developed billing, inventory, and admin authentication modules, automating a previously manual billing and stock-tracking process
- Designed a normalized MySQL schema and integrated Jasper Reports for real-time sales and inventory reporting, replacing manual reporting workflows

Online Bookshop Web Application — Java, Hibernate, JSP, Servlets

- Built wishlist, cart, and multi-attribute product filtering, improving product discoverability and browsing experience
- Implemented MVC architecture with session-based state management, ensuring reliable state handling across concurrent user sessions

EDUCATION

BSc (Hons) Software Engineering Birmingham City University

2024 | Second Class Upper (2:1)

Professional Diploma in Software Engineering UK Awards

2023

CERTIFICATIONS

- Oracle Certified — Java Programmer Learning Path (Java Programming Badge)
- Oracle Java Foundations — Training and Assessment
